

Relationship Between Genres and Release Year

Group6

26/11/2019

Read the data

```
data <- read.csv("cleanedData.csv")  
library(ggplot2)
```

```
ggplot(data = data, aes(x = Release_year, y = AlbumPopularity, col = isPop)) + geom_point(alpha=.3, size=100)
```

```
ggplot(data = data, aes(x = Release_year, y = AlbumPopularity, col = isRock)) + geom_point(alpha=.3, size=100)
```

```
ggplot(data = data, aes(x = Release_year, y = AlbumPopularity, col = isFolk)) + geom_point(alpha=.3, si
```

```
ggplot(data = data, aes(x = Release_year, y = AlbumPopularity, col = isTechno)) + geom_point(alpha=.3, s
```

```
ggplot(data = data, aes(x = Release_year, y = AlbumPopularity, col = isRap)) + geom_point(alpha=.3, size=100)
```

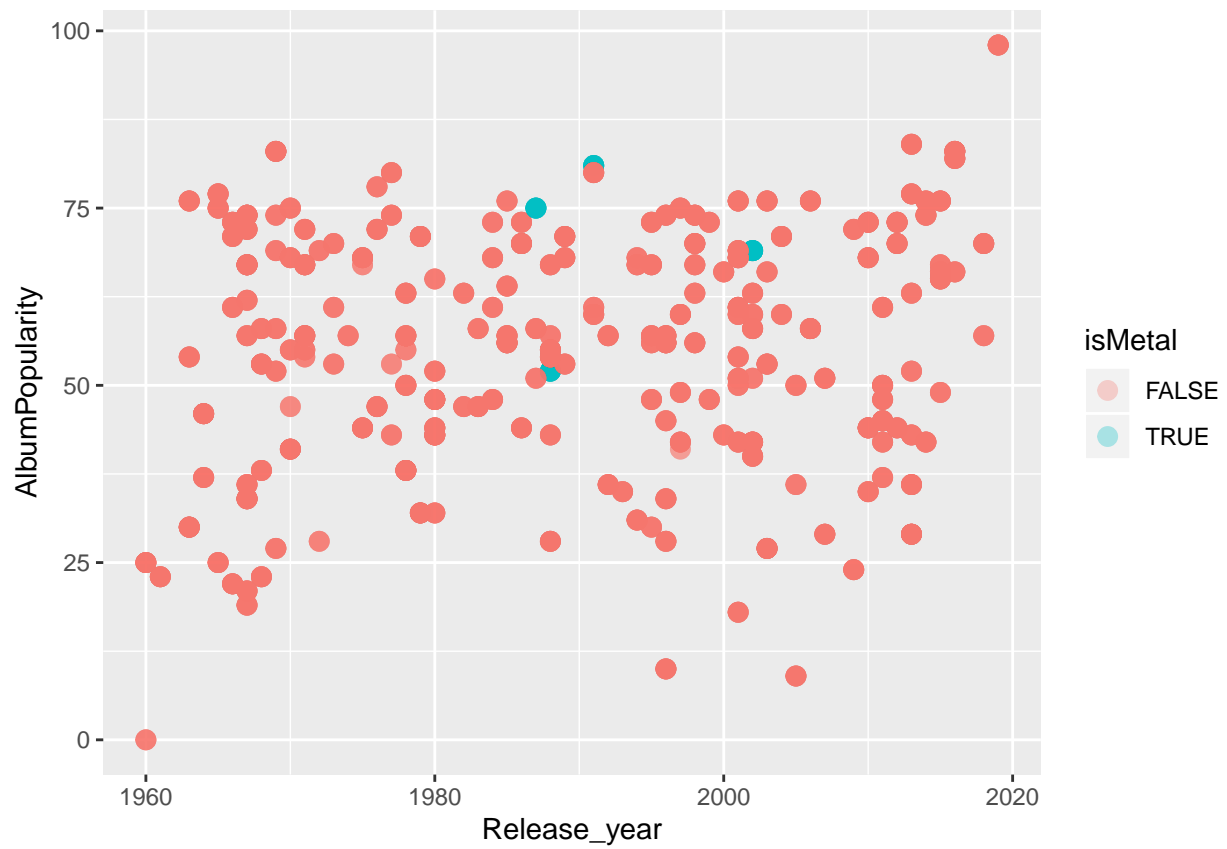

```
ggplot(data = data, aes(x = Release_year, y = AlbumPopularity, col = isJazz)) + geom_point(alpha=.3, si
```

```
ggplot(data = data, aes(x = Release_year, y = AlbumPopularity, col = isIndie)) + geom_point(alpha=.3, s
```

```
ggplot(data = data, aes(x = Release_year, y = AlbumPopularity, col = isMetal)) + geom_point(alpha=.3, s
```

```
ggplot(data = data, aes(x = Release_year, y = AlbumPopularity, col = isBlues)) + geom_point(alpha=.3, s
```

```
ggplot(data = data, aes(x = Release_year, y = AlbumPopularity, col = isPunk)) + geom_point(alpha=.3, si
```
